DEMANDING PROCESSES, SUSTAINABLE SOLUTIONS

## SUURMOND & AUTOCLAVE

Since 1974, Suurmond has designed, manufactured and delivered sustainable and custom made solutions for the processing industry. With a portfolio of high quality and sustainable products, years of experience and know-how, Suurmond is able to help you improve your production efficiency.

In the year 2000 Autoclave became part of the Suurmond group allowing us to offer products from R&D to full production.

## OUR MARKETS

Our products are all designed to improve your production efficiency. Using the highly innovative and engineered products from leading brands, we offer sustainable and reliable solutions for processes from lab up to production scale in the following industries:

- (Petro) chemical industry
- Polymer industry
- Extrusion industry
- Food industry
- Bio industry
- Pharmaceutical industry

## WHATEVER YOU REQUIRE

Do you have demanding processes? Such as low or high pressure, viscosity or temperature? Engineered solutions for your demanding processes are our specialty! After careful consultation, we offer dedicated solutions using high end products with high quality finishing.

## WHY CHOOSE SUURMOND?

To be sure that you have the best solution for your process!

- Sparring partner and sounding board for the end user
- Interactive approach with flexibility in mind
- Long experience and know-how since 1974 in the (processing) industry
- Precise and well considered selection of the right materials and components
- Use of reliable top quality components for sustainable solutions
- Long-life products
- High quality finishing

## YOU CAN RELY ON OUR SUPPORT AND KNOW-HOW:

- Analysis of your process and production line
- Design and production of (complete) tailored units
- Optimization and trouble-shooting
- Inspection and repair
- Start-up help before commissioning
- Training
